

Easy colour,
anywhere,
every time?
Why not!

An aqueous or organic
colour excipient, a ready-
to-use suspension

General Information on BIOGRUND

Since 1999, **BIOGRUND** has been developing and producing special powder preparations for film coating, sugar-coating, colouring and tableting, which are used in pharmaceutical products, food and nutritional supplements and cosmetics all over the world. These one-step products minimize and simplify working times for all applications. Easy, fast and reliable!

Product Information BonuTone®

BIOGRUND's ready-to-use colouring agent **BonuTone®** provides a homogeneous solid-colour product. It is a unique, aqueous or organic dispersion of colours with additional excipients.

BonuTone® is a ready-to-use master batch, developed for the colouring of all kinds of creams, sugar-coating dispersions and chewing gums. It can be used in liquids in a simple and easy way.

Clear, white and coloured dispersions can be individually created for different products and tailor-made according to customer requirements. A reproducible high-quality colour can be guaranteed for all **BonuTone®** products. Due to its excellent compatibility with other excipients and active ingredients, customised solutions are possible – a unique appearance for your products!

Regulatory and quality aspects: All **BonuTone®** formulations are developed to meet the official regulatory requirements of the user's country for pharmaceutical products and for nutritional or dietary supplements.
