

Using a
one-step-system
for conventional
sugar-coating?
Why not?

A ready-to-use sugar-coating compound for a coloured, smooth and glossy appearance of your product.

General Information on BIOGRUND

Since 1999, **BIOGRUND** has been developing and producing special powder preparations for film coating, sugar-coating, colouring and tableting, which are used in pharmaceutical products, food and nutritional supplements and cosmetics all over the world. These one-step products minimize and simplify working times for all applications. Easy, fast and reliable!

Product Information IsuPolish® S

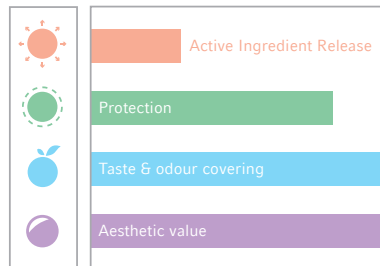

BIOGRUND's sugar-coating system **IsuPolish® S** provides a sugar dragée with excellent taste and odour masking properties. Furthermore the dragée gets a smooth and glossy appearance.

IsuPolish® S is a unique, dry milled, homogeneous blend of sucrose, pigments and additional excipients. The ready-to-use master batch is developed for the sugar-coating of solid dosage forms, such as tablets, granules, chewing gums, nuts, fruits, etc. It is easy to suspend and a reproducible high-quality sugar-coating is guaranteed. Clear, white and coloured preparations can be tailor-made according to customer requirements.

IsuPolish® S can be applied by using conventional or modern sugar-coating equipment.

Regulatory and quality aspects: All **IsuPolish® S** formulations are developed to meet the official regulatory requirements of the user's country for pharmaceutical products, nutritional supplements, confectionary and other food applications.
