

A new age for
fast release film
coating?
Why not!

High quality active
ingredient protection,
a fast soluble film
coating compound.

General Information on BIOGRUND

Since 1999, **BIOGRUND** has been the specialist for the homogeneous mixing of excipients and carriers. With locations in Germany, Switzerland, America and Russia, we support the food supplement and pharmaceutical industry in the development, formulation and production of solid oral dosage forms. The tailor-made and ready-to-use special powder mixtures for film coating, sugar-coating, coloring and tableting enable optimum results in a short time. Easy, fast and reliable!

Product Information AquaPolish®

BIOGRUND's one-step film coating system **AquaPolish®** provides a protective and fast release film on tablets, pellets, granules and capsules. It is a unique, dry milled, homogeneous blend of selected film-forming cellulose ethers with plasticizing and coloring additives.

AquaPolish® has been developed for the coating of all kinds of solid dosage forms. It is produced with an innovative mixing and milling system, achieving the highest quality of a homogeneous and deagglomerated coating compound. It is easily soluble and a reproducible high-quality film coating can be achieved. Clear, white and colored preparations can be tailor-made according to customer requirements.

Furthermore, a wide range of natural colored **AquaPolish®** film coating formulations – free of titanium dioxide and iron oxides – are available. Formulated with substitutes for whitening, it is possible to replace titanium dioxide without losing the usual opacity and brightness on your product. For Clean Label purposes it can also be offered free of talc, synthetic polymers and colors.

It is designed to improve running production processes and, furthermore, is an ideal basis for researching new solutions. Because of its particular formulae, it can be used in a simple and easy way. It can be applied using conventional or modern coating equipment.

Regulatory and quality aspects: All **AquaPolish®** formulations are developed to meet the official regulatory requirements of the user's country for pharmaceutical products and for nutritional or dietary supplements.
