

A film coating
that really
masks taste?
Why not!

Masks the bad taste of active ingredients, an easy-to-use film coating compound.

General Information on BIOGRUND

Since 1999, **BIOGRUND** has been the specialist for the homogeneous mixing of excipients and carriers. With locations in Germany, Switzerland, America and Russia, we support the food supplement and pharmaceutical industry in the development, formulation and production of solid oral dosage forms. The tailor-made and ready-to-use special powder mixtures for film coating, sugar-coating, coloring and tableting enable optimum results in a short time. Easy, fast and reliable!

Product Information AquaPolish® TC

BIOGRUND's one-step film coating system **AquaPolish® TC** perfectly masks bad tasting actives and provides a fast soluble film on tablets, pellets, granules and capsules.

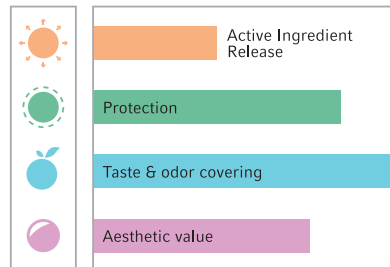

AquaPolish® TC is a combination of HPMC, HPC and other cellulose ethers with taste masking additives. Due to the further additives, which form a hardly soluble film, a taste-masking is achieved.

The compound is a homogeneous, dry-milled powder, developed for the coating of all kinds of solid dosage forms. It is easy to suspend and a reproducible high-quality film coating can be guaranteed. Clear, white and colored preparations can be tailor-made according to customer requirements.

AquaPolish® TC can be applied by using conventional or modern coating equipment.

Regulatory and quality aspects: All **AquaPolish® TC** formulations are developed to meet the official regulatory requirements of the user's country for pharmaceutical products and for nutritional or dietary supplements.
