

Assign your
coating to a
specialist who
cares?
Why not!

A contract manufactured
registered composition, in
a ready-to-use film coating
compound.

Product Information

AquaPolish® C

BIOGRUND's one-step film coating system **AquaPolish® C** provides the registered composition of a customer as an easy-to-use compound for coating tablets, pellets, granules and capsules.

AquaPolish® C has been developed to improve running production processes. Furthermore, it is an ideal basis for researching new solutions. The contract manufactured compound is a unique, dry milled, homogeneous blend of film coating polymers, plasticizing and coloring additives and other excipients. It can be applied by using conventional or modern coating equipment.

The product is manufactured with an innovative mixing and milling system, achieving the highest quality of a homogeneous deagglomerated coating compound. **AquaPolish® C** is easily soluble and a reproducible high-quality film coating can be guaranteed. Clear, white and colored preparations can be tailor-made according to customer requirements.

Regulatory and quality aspects: All **AquaPolish® C** formulations are developed to meet the official regulatory requirements of the user's country for pharmaceutical products and for nutritional or dietary supplements.

Product Performance

	Active Ingredient Release
	Protection
	Taste & odor covering
	Aesthetic value

General Information on BIOGRUND

Since 1999, **BIOGRUND** has been the specialist for the homogeneous mixing of excipients and carriers. With locations in Germany, Switzerland, America and Russia, we support the food supplement and pharmaceutical industry in the development, formulation and production of solid oral dosage forms. The tailor-made and ready-to-use special powder mixtures for film coating, sugar-coating, coloring and tableting enable optimum results in a short time. Easy, fast and reliable!
